14/06/27:
Cross the Streams (Black and White + Partially Inverted) by Grant Fikes
Theme: Logical

Rules: Double variation of Cross the Streams rules. First, both the shaded and unshaded cells must be valid streams (single connected groups with no 2x2 areas). Second, while row clues act as usual and refer to shaded cells, the column clues refer to the distribution of white cells.

black cells \ white cells
