

14/09/16: Pentominous by Grant Fikes

Theme: Logical

Divide this grid into 20 regions each containing 5 cells. Regions with the same shape (including rotations/reflections) cannot share an edge. A cell with a letter in it must be part of the pentomino shape normally associated with that letter; an inventory of polyominoes is given below the puzzle.

Answer Entry: Enter the letter of the shape in each cell in the marked rows.

				V		T		
▶ A								
		Y	U				T	
				P				
	V			Y				
▶ B								N
			N					

The inventory shows 12 polyominoes of size 5 cells. The letters placed are: U, N, W, Z, Y, T, F, L, P, V, X.
