

13/08/21:

Island of Numbers by Serkan Yürekli

Theme: Hidden Words --

each row of letters spells another word (SERF, ...)

Rules: Put each number (given as a word) into the grid, one letter per cell, as a snake-like strip which does not touch or cross itself. Some letters of the words are given. The remaining cells should be painted black to form a continuous wall as in a Nurikabe puzzle with no 2x2 shaded regions.
