## 13/11/05: Graffiti by Serkan Yürekli Theme: Hidden

Rules: Blacken some cells and then draw a single non-intersecting loop through all remaining white cells. Outside clues indicate the size of all groups of blackened cells in that row or column in order. There must be at least one white cell between each of these groups. When no clues are given, any number of cells may be shaded in that row/column. **ANSWER ENTRY:** For each column from left-to-right, enter the number of turns the loop makes.
