

13/12/13:

Digital Snail by Palmer Mebane

Theme: WPC Practice

Rules: Enter digits 1 through 4 into some cells so that each row and column contains each digit exactly once. Also, along the snail (from the upper-left corner and spiraling to the center) digits must occur in 1-2-3-4-1-2-3-4-... order. Some clues are given in the grid in the form of lit digital segments. Each of these cells must contain a digit, and that digit must have that segment lit in the form shown below the puzzle.

ANSWER ENTRY: Enter the marked rows from left to right, separating the two rows by a comma.
Use an X (capital letter) for each empty square.
