## Tapa-Like Loop by Serkan Yürekli Theme: Triple Threat

Rules: In this variation of Tapa, the wall is in the form of a single non-intersecting loop.

Clues inside the grid represent the number of neighboring cells visited by the loop; if there is more than one number in a cell, each number should be represented with a separate loop segment. There is no 2x2 rule of Tapa in this puzzle.

ANSWER ENTRY: Enter the length in cells of the horizontal loop segments from left to right in the marked rows, starting at the top. Separate each row's entry with a comma.
