## 14/03/22:

## Hamle Sudoku by Prasanna Seshadri

Rules: Variation of Sudoku. Each number in the top grid must be moved either up, down, left, or right the same number of cells as that number's value without crossing the border of the grid. Numbers must all land on unique spots, but unlike in normal Hamle numbers may be adjacent after moving. Then solve the resulting sudoku. (Note: It is possible for a number to have two valid movement options in the solution; it is only required that at least one direction of movement exists for each number.)

| 6 |  | 4 |  |  | 8 | 3 |  | 7 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | 7 |  |  | 4 |  |  | 5 |  |
| 1 |  |  | 2 |  |  | 5 |  | 4 |
|  |  | 1 |  |  | 4 |  |  | 1 |
|  | 1 |  |  | 4 |  |  | 5 |  |
| 8 |  |  | 3 |  |  | 3 |  |  |
| 2 |  | 6 |  |  | 3 |  |  | 2 |
|  | 1 |  |  | 2 |  |  | 7 |  |
| 8 |  | 6 | 2 |  |  | 6 |  | 5 |
