

14/04/30:

Double Minesweeper by Serkan Yürekli

Theme: Symmetry and Logic

Rules: Place either 0, 1, or 2 mines into each empty cell so that each number represents the total count of mines in all neighboring cells, including diagonally adjacent cells.

ANSWER ENTRY: For each cell in the marked rows, enter the number of mines (0, 1, 2) for each cell. Enter 0 if the cell is a number cell. Separate each row's entry from the next with a comma. In this example, the answer is "022102,002000"

	3		3		3		4
A				3		6	
	5		5		3		3
				5			
	4		7		4		2
B		5		5			
	3		4		2		3
