

14/05/06:

Araf (Inequality) by Dan Katz

Theme: Clue Symmetry and Logic

Rules: Divide the grid into some regions formed of edge-adjacent squares.

Each cell is part of one region, and each region should contain exactly two given numbers, one in a yellow circle ($>$) and one in a red circle ($<$). Each region must have an area that is strictly between those numbers.

ANSWER ENTRY: Enter the number of cells in each connected group (between bold lines) in the marked rows.
