14/09/18: Pentominous by Murat Can Tonta
Theme: Roman Numerals

Divide this grid into 20 regions each containing 5 cells. Regions with the same shape (including rotations/reflections) cannot share an edge. A cell with a letter in it must be part of the pentomino shape normally associated with that letter; an inventory of polyominoes is given below the puzzle.
Answer Entry: Enter the letter of the shape in each cell in the marked rows.
