15/09/04:
Easy as ABC Numbers by Prasanna Seshadri
Theme: TWENTY-15
(Originally on 2015 Indian Puzzle Championship)

Rules: Fill some empty cells with the letters E, N, T, W, Y (A, B, C, D, E in the example) so that each row and column contains each letter exactly once. Also, each bold outlined region as well as the set of gray cells contains each letter exactly once. Some cells will remain blank. The clues outside the grid, which contain a letter 'X' and number 'N', indicate that X is the Nth letter seen in that row or column.

Answer Entry: Enter the letters in the marked rows in order from left to right, separating the rows with a comma. Use an X for empty cells, and USE CAPITAL LETTERS. This example has the key "XDACEBX,CBXDXEA".
