

16/03/17:
Ripple Effect by Grant Fikes
Theme: Logical

Rules: Place a number into each cell so that each region contains the numbers 1 to N, where N is the size of the region. A cell with the number M must have at least M cells between it and any other instance of the same number M in that row or column.

ANSWER ENTRY: Enter the numbers in each cell from left to right in the marked rows, separating the two rows with a comma.

A 10x10 grid puzzle with regions defined by thick black lines. The grid is 10 columns wide and 10 rows high. The regions are as follows:

- Region 1: A 2x2 square in the top-left corner (rows 1-2, columns 1-2).
- Region 2: A 2x2 square in the top-right corner (rows 1-2, columns 8-9).
- Region 3: A 2x2 square in the middle-left (rows 4-5, columns 3-4).
- Region 4: A 2x2 square in the middle-right (rows 4-5, columns 6-7).
- Region 5: A 2x2 square in the bottom-right (rows 7-8, columns 8-9).
- Region 6: A 2x2 square in the bottom-left (rows 9-10, columns 1-2).
- Region 7: A 2x2 square in the bottom-middle (rows 9-10, columns 4-5).
- Region 8: A 2x2 square in the bottom-right-middle (rows 9-10, columns 6-7).

Two rows are marked with grey triangles on the left:

- Row 6 is marked with a grey triangle labeled 'A'.
- Row 8 is marked with a grey triangle labeled 'B'.

Numbers are placed in the following cells:

- Row 4, Column 4: 1
- Row 8, Column 9: 1
