

16/08/20:

Multi Skyscrapers by Serkan Yürekli

Theme: The Clueless Center (for Veep)

Rules: Standard Skyscrapers rules. The grid is made of 9 overlapping 5x5 Skyscrapers puzzles. The clue cells shared between grids must see the same number of buildings (i.e., you should fill in all interior gray cells with clue numbers as these are used by two grids).

Answer Entry: Enter the fifteen digits (in the white cells) within the marked rows from left to right, separating the two rows with a comma.

The grid is a 15x15 grid divided into 9 overlapping 5x5 sub-grids. Clue numbers are placed in gray cells. The grid is divided into three vertical sections of 5 columns each. The clue numbers are as follows:

- Row 1: (1,2)=2, (2,3)=3, (2,4)=4, (3,1)=2, (3,2)=4, (3,3)=4
- Row 2: (1,1)=4, (4,4)=4, (5,3)=3, (5,5)=3
- Row 3: (1,1)=2, (5,3)=3, (5,5)=2
- Row 4: (1,1)=2, (5,5)=3
- Row 5: (3,4)=2, (5,4)=3
- Row 6: (1,1)=2, (5,5)=3
- Row 7: (1,1)=1, (5,5)=3
- Row 8: (1,1)=3, (3,1)=4, (5,3)=3
- Row 9: (1,1)=4, (4,4)=4, (5,3)=3, (5,5)=3
- Row 10: (1,1)=3, (4,4)=3, (5,3)=2, (5,5)=3
- Row 11: (1,1)=2, (5,5)=1
- Row 12: (3,3)=3, (3,4)=1, (3,5)=3, (4,3)=1, (4,4)=3, (5,4)=2

Marked rows for answer entry:

- Row 7: A
- Row 10: B
