# Minesweeper (Even Rows/Columns) by Serkan Yürekli

## Theme: Clue Symmetry & Logic

Place a mine into some of the empty cells so that each number represents the total count of mines in neighboring cells, including diagonally adjacent cells. Also, an even number of mines must be placed in each row and in each column.

			3		2		2			
	7								5	
A					7		4			2
		5								2
	3		3			6			6	
B				5				3		
		4				7			3	3
C	2								3	
	2			5		6				
D		3								7
				4		4		4
