17/09/14:
Cross the Streams (SLICY) by Bryce Herdt
Theme: Logical

Rules: Variation of Cross the Streams. Instead of the "no 2×2 shaded square" rule, in this hexagonal grid no 3 cells that share a point can be shaded. Also, the shaded region must be able to be split into tetrahexes to form a valid SLICY solution (meaning all tetrahexes are connected but no two tetrahexes sharing an edge are the same shape, including rotations and reflections).

Clues:
- 1 1 1
- * 4 ? ?
- A
- B
- * 9 *
- C 3 *
- * 3 *
- D
- * 3 *
