# 13/11/02: <br> Smashed Sums (False) by Palmer Mebane Theme: 22nd WPC in 2013 

(Note: ignore shading of clues when solving -- this is just to accentuate the theme)
Rules: Fill each row and column of the grid with the numbers 1-6 and two blackened cells. Numbers outside the grid are either one lower or one higher than the sum of the digits between the two blackened cells in that row/column. A sum of zero is possible. Blackened cells are allowed to touch.
