Sudoku (Irregular) by Thomas Snyder
Theme: Desperately Seeking Seven
(shading is just for artistic purposes)

Rules: Place a digit from 1 to 7 into each cell so that no digit repeats in any row, column, or bold outlined region.

14/04/15: Negative Tetromino by Serkan Yürekli Theme: Words

Rules: Divide the white cells into tetrominoes so that no two regions sharing an edge are the same tetromino (L, I, O, S, or T considering rotation and reflection). Regions may contain at most 1 cell with given letters; regions with such a cell CANNOT have the same tetromino shape as any of the letters in that cell.

ANSWER ENTRY: Enter the letter of the tetromino region for each cell in the marked rows, separating the rows with a comma. Use capital letters (LIOST).

14/04/19:
 Ripple Effect by Grant Fikes
 Theme: Near Maximal Difficulty with
 Near Minimal Givens

Rules: Place a number into each cell so that each region contains the numbers 1 to N, where N is the size of the region. A cell with the number M must have at least M cells between it and any other instance of the same number M in that row or column.

ANSWER ENTRY: Enter the numbers in each cell from left to right in the marked rows, separating the two rows with a comma.

The puzzle grid is 10x10. The regions are defined by thick black lines. The pre-filled numbers are as follows:

- Row 1, Column 2: 4
- Row 4, Column 5: 6
- Row 7, Column 6: 4
- Row 10, Column 9: 1

On the left side of the grid, there are two grey arrow-shaped markers:

- Marker 'A' points to the 5th row.
- Marker 'B' points to the 9th row.
