Pentominous by Grant Fikes

Theme: No P in this uzzle?

(11 pentomino letters, but not P, appear as clues)

Divide this grid into 20 regions each containing 5 cells. Regions with the same shape (including rotations/reflections) cannot share an edge. A cell with a letter in it must be part of the pentomino shape normally associated with that letter; an inventory of polyominoes is given below the puzzle.

Answer Entry: Enter the letter of the shape in each cell in the marked rows.

B

							I	
		W						Z
F								
			N					Y
		V					T	
								U
		X		L				

A

The inventory shows 11 pentomino shapes, each with a letter placed in its characteristic arrangement of 5 cells:

- I:** A vertical column of 5 cells.
- N:** A 2x3 block with the top-right cell missing.
- U:** A 3x3 block with the top-right and bottom-right cells missing.
- W:** A 2x3 block with the top-right and bottom-right cells missing.
- Z:** A 2x3 block with the top-left and bottom-left cells missing.
- Y:** A 3x3 block with the top-right and bottom-right cells missing.
- T:** A 3x3 block with the top-right and bottom-right cells missing.
- F:** A 2x3 block with the top-right and bottom-right cells missing.
- L:** A 3x3 block with the top-right and bottom-right cells missing.
- P:** A 2x3 block with the top-right and bottom-right cells missing.
- V:** A 2x3 block with the top-right and bottom-right cells missing.
- X:** A 3x3 block with the top-right and bottom-right cells missing.
