15/07/16:
 Pentominous by Grant Fikes
 Theme: I Don't Know Y

Divide this grid into 20 regions each containing 5 cells. Regions with the same shape (including rotations/reflections) cannot share an edge. A cell with a letter in it must be part of the pentomino shape normally associated with that letter; an inventory of polyominoes is given below the puzzle.

Y		Y		Y			Y		
			Y						
									P
		Y							
A									
		Y			Y				
B									
				Y					
	L								I

The inventory shows 10 pentomino shapes, each with a letter in a specific cell:

- U:** A pentomino with a 'U' in the top-middle cell.
- N:** A pentomino with an 'N' in the top-middle cell.
- W:** A pentomino with a 'W' in the top-middle cell.
- Z:** A pentomino with a 'Z' in the top-middle cell.
- Y:** A pentomino with a 'Y' in the top-middle cell.
- T:** A pentomino with a 'T' in the top-middle cell.
- F:** A pentomino with an 'F' in the top-middle cell.
- L:** A pentomino with an 'L' in the top-middle cell.
- P:** A pentomino with a 'P' in the top-middle cell.
- V:** A pentomino with a 'V' in the top-middle cell.
- X:** A pentomino with an 'X' in the top-middle cell.
