				1					9
4				1					
									4
			7				4		
5							10		
	3		3		4				3

15/08/19:
Nanro (Non-consecutive) by Grant Fikes
Theme: Clueless

Rules: Standard Nanro rules. Also, when any two numbers are orthogonally adjacent across a region boundary, the numbers must be at least two or more apart (i.e., they cannot be the same number, or consecutive numbers).

15/08/20:
Fillomino (Non-consecutive) by Grant Fikes
Theme: Clue Symmetry and Logic
Rules: Variation of Fillomino rules. No two polyominoes with the same area, *or with areas that differ by one*, can share an edge.
