## 15/09/08:

Tapa (Line) by Serkan Yürekli
Theme: Corners

Rules: Standard Tapa rules. Also, there may not be four consecutive black cells in any row or column.

A | 2 |  |  |  | ${ }^{1} 2$ |  |  |  |  | 2 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  | 7 |  |  | 7 |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  | 3 | 3 |  |  | ${ }^{2}$ | 2 |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
| 2 |  |  |  |  | ${ }^{2}$ | 2 |  |  |  |
| C |  |  |  |  |  |  |  |  |  |

## 15/09/10: <br> Tapa (Islands) by Serkan Yürekli Theme: Clue Symmetry and Logic

Rules: Standard Tapa rules. Also, unpainted cells form separated areas, "islands", that contain at most one clue cell. If there is a clue cell in an island, at least one digit of the clue equals the area of the island in cells.

A
B
C

|  |  | ${ }^{1} 3$ |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  | $1_{3}^{1}$ |  |  |  | 6 |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  | $1_{4}$ |  |  | $1_{3} 1$ |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  | $2_{3}^{2}$ |  |  | $3_{3}$ |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  | 5 |  |  |  | $2_{4}$ |  |  |  |  |
|  |  |  |  |  |  |  | 4 |  |  |

## 15/09/12: <br> Tapa (Star) by Serkan Yürekli Theme: Clue Symmetry and Logic

Rules: Standard Tapa rules. Also, each row and column must contain exactly two stars (one in the example). Stars cannot touch each other, even diagonally, and all stars must be on the Tapa wall.

Answer Entry (like Star Battle): For each row from top to bottom, enter the number of the first column from the left where a star appears.
Enter these numbers as a single string with no separators.
