Cave (Diagonal) by Prasanna Seshadri

Theme: Clue Symmetry and Logic (for Veep)

Variation of Cave. Number clues give the total count of cells connected diagonally to a numbered cell *including the cell itself*. Also, there can be no 2x2 area fully inside the cave.

Word Connection by Serkan Yürekli Theme: Up to Eleven (for Phleb)

Place the words into the grid (one letter per cell) so that they do not touch each other, not even diagonally, and so that they can be read in a straight line in a vertical or horizontal direction. Some letters in the words are already given in the grid.

Then find a path that passes through every cell of the grid, starting with the first letter of the first word, passing through the words in order from their first letters to their last letters, and ending at the last letter of the last word. Ignore the black cell.

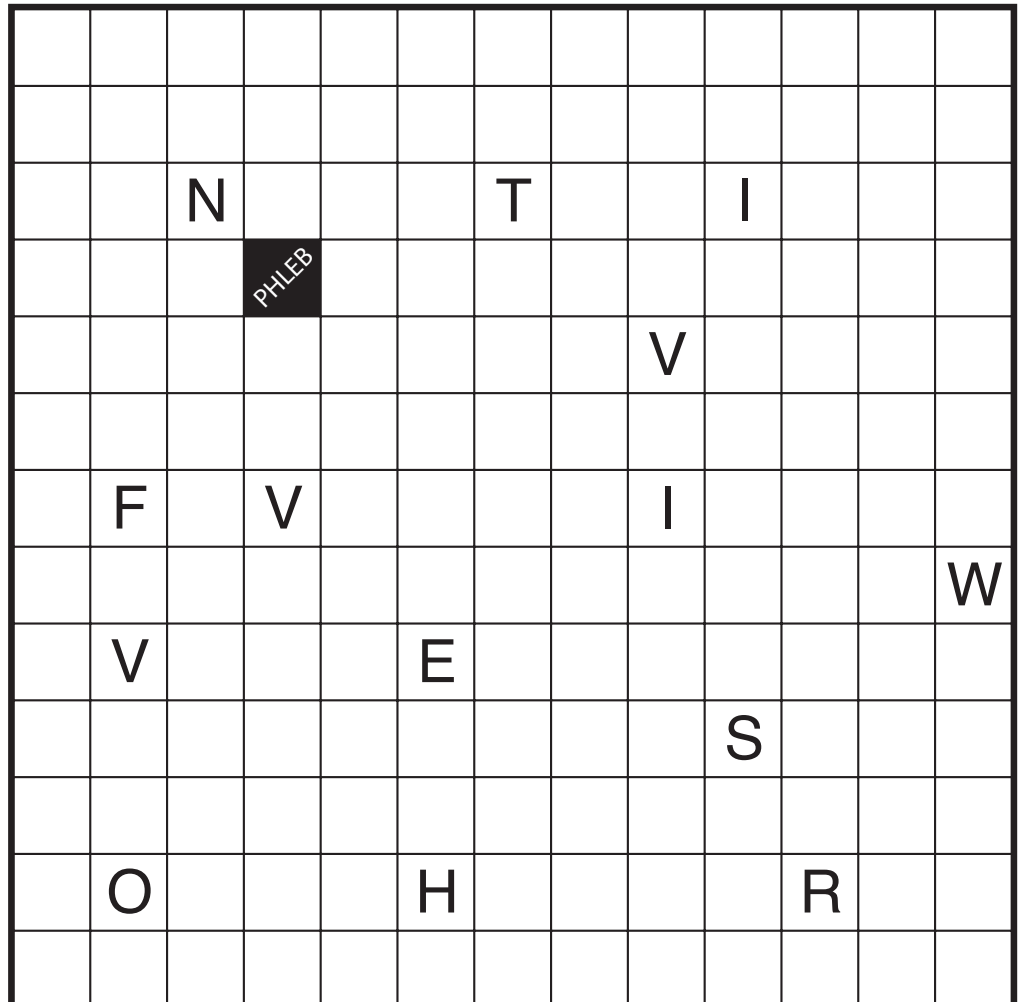

ANSWER ENTRY:

Enter the number of turns the path takes between each of the words in order as a single string of numbers. (Ignore turns in cells with letters.) The answer for this example is "224".

- 1 ONE
- 2 TWO
- 3 THREE
- 4 FOUR

- 1 ONE
- 2 TWO
- 3 THREE
- 4 FOUR
- 5 FIVE
- 6 SIX
- 7 SEVEN
- 8 EIGHT
- 9 NINE
- 10 TEN
- 11 ELEVEN

16/07/01:

Masyu (Regional) by Prasanna Seshadri

Theme: Clue Symmetry and Logic (for Chris Green)

Rules: Standard Masyu rules. Also, the loop must make the same number of turns in each bold region that it enters. It is up to you to determine how many turns this is. Be sure to count all turns, including turns in black circles. (The loop does not necessarily enter all regions.)

16/07/02:

Easy as Kakuro by Serkan Yürekli

Theme: RANDY (for patron Randy Rogers)

Variation of Kakuro and Easy as ABC.

Enter a single digit from 1 to 9 or letter from R, A, N, D, Y into each cell so that each full row and column contains each letter exactly once. A number clue indicates the sum of the digits in the across or down entry. No digit is repeated within an entry (but digits may repeat within a full row or column). A letter clue indicates the first letter seen from that direction after the clue. (For clarity, all letter and number clues point down or right except for the letter clues on the bottom/right edges of the entire grid which point up/left.)
