## 16/09/05: <br> Masyu by Grant Fikes Theme: Logical

## 16/09/06: <br> Pata by Serkan Yürekli <br> Theme: Clue Symmetry and Logic

Rules: Variation of Tapa. The clue numbers now refer to the groups of unshaded segments around that cell. Cells with numbers count as unshaded cells for adjacent clues. All other rules for the shaded Tapa are the same as usual.

## 16/09/09:

## Sudoku (Smashed Sums) by Prasanna Seshadri

 Theme: No ZeroesRules: Variation of Sudoku. Instead of the digits 1 through 9, this puzzle uses the digits 1 through 7 as well as two black squares in each row, column, and bold region. Clues outside the grid indicate the sum of all digits between the black squares in that row/column.
Answer Entry: Enter the 2nd row from left to right, followed by a comma, followed by the 8th row from left to right. Use a capital $X$ for all black squares.

## 16/09/10:

Fillomino (Symmetry) by John Bulten Theme: Salt and Pepper
(alphanumerically, $19=S, 16=P$ )
Rules: Standard Fillomino Rules. Also, all polyominoes should have rotational symmetry.
