## 2018/04/09: Statue Park by Murat Can Tonta Theme: Antisymmetry

2018/04/10: Skyscrapers by Serkan Yürekli Theme: A Land of 2

## 2018/04/12: Snake Pit by Serkan Yürekli Theme: Fourspower

Rules: Divide the grid along the boundary lines so that every cell belongs to a snake. A snake is a one-cell-wide path at least two cells long that does not touch itself, not even diagonally. Circled cells must be at one of the ends of a snake. A snake may contain one circled cell, two circled cells, or no circled cells at all. Numbered cells must be part of a snake with a length of exactly that number of cells.
A snake may contain one number, multiple identical numbers, or no numbers at all. Two snakes of the same length cannot touch each other horizontally or vertically.

## 2018/04/13: Minesweeper (Pentomino) by Murat Can Tonta Theme: Clue Symmetry and Logic

**Rules:** Place the twelve pentominoes into the grid, rotations and reflections allowed. Pentominoes cannot cover the numbered cells, and different pentomino shapes cannot be placed in adjacent cells that share an edge or corner. Numbered cells indicate how many of the surrounding cells (including diagonally adjacent cells) contain parts of the pentominoes.
