# Double Kakuro (Invisible) by Grant Fikes

Rules: Variation of Kakuro. Some 2x2 white regions are to be shaded gray and treated as single (2x2) cells in the Double Kakuro, the position of these cells must be found while solving, and each gray cell is to be filled by a single digit which sits in multiple rows and columns. No digits can repeat within an entry, regardless of whether they are in small or large cells.
