

Tight Fit Sudoku (Difference) by Prasanna Seshadri

Rules: Variation of Tight Fit Sudoku. Insert a number from $\{0,1,2,2,2,3,3,9\}$ into each cell so that the full number set appears in each row, column, and bold region. Some white and black circles are given on some slashes. If there is a black circle with the slash, the bigger number must be above the smaller number. If there is a white circle with the slash, the smaller number must be above the bigger number. A number in a circle gives the difference between the two values in the cell with the slash. If the difference is 0, the color of the circle is irrelevant.

$\{0,1,2,2,2,3,3,9\}$

$\frac{3}{2}$					$\frac{\textcircled{3}}{\textcircled{3}}$
	$\frac{1}{9}$			$\frac{\textcircled{1}}{\textcircled{1}}$	
		$\frac{9}{1}$	$\frac{\bullet}{\bullet}$		
		$\frac{\bullet}{\bullet}$	$\frac{3}{2}$		
	$\frac{\textcircled{0}}{\textcircled{0}}$			$\frac{2}{0}$	
$\frac{\textcircled{2}}{\textcircled{2}}$					$\frac{2}{2}$

Tight Fitting a New Beginning
