

SLICY by Grant Fikes

Rules: Variation of LITS. Shade exactly four cells in each outlined region to form an S, L, I, C, or Y tetrahex. When all regions have been shaded, the following conditions must be true:

- 1) All shaded cells will be connected through a network of adjacent shaded cells;
- 2) No three shaded cells will share a common vertex;
- 3) When two tetrahexes share an edge in adjacent regions, they must not be the same type (S, L, I, C, or Y), regardless of potential rotations or reflections.
