

Nurikabe (Full) by JinHoo Ahn

Rules: Variation of Nurikabe. Shade some of the numbered cells so that the grid is divided into white regions, with each cell in such a region containing a number identical to the area of the region. Two white regions may only touch diagonally. All shaded cells must be connected with each other, but no 2x2 group of cells can be entirely shaded black.

1	1	4	4	5	5
1	2	2	4	5	6
1	2	3	4	5	6
1	2	3	4	5	6
1	2	3	5	5	6
