

Up/Down Sudoku by clover!

Rules: Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). Along each line, every number is either greater than all the numbers it is directly connected to, or less than all of the numbers it is directly connected to. (Note that this results in a pattern of high/low/high/low along the length of each line.)
