

A Story of Self-setting Sudoku #2 by Thomas Snyder

The second level of self-setting is “Partial Setting Automation”. The author, who has come up with a previously interesting grid pattern, finds a new starting seed, and then uses computer assistance to add all other numbers to generate lots of valid puzzles which guide the picking of a preferred “gem” from suggested characteristics including novelty, breadth of solving path, and the kind of steps.

	9		8		7		6	
1		2		3		4		9
	8						2	
9								1
	4						3	
4		6		2		8		5
	3		7		6		9
