

## Back to Basics by Dr. Sudoku

Rules: Insert a number from 1 to 9 into each white cell so that no number repeats in any row, column, or bold region.

*Our testing is showing that we may have an ASI (believe the hype!), but not a GASI (Genuinely Approachable Sudoku Intelligence) without more prompting. So we've started to use prompts to get data for reinforcement learning with way mo' focus on Sudoku-based decision making. This one starts with the basics, going from 0 to 9 in 8.1 seconds, a new sudoku speed record.*
