Nonconsecutive Sudoku by Philip Newman

Rules: Insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region. No two orthogonally adjacent cells can be consecutive (i.e., differ by 1).

4								7
	5			3			8	
			2		4			
		3				5		
	4			9			6	
		5				7		
			6		8			
	2			7			5	
3								6
