

## Multi-car Pileup by Dr. Sudoku (and Thomas Snyder)

Rules: Insert a number from 1 to 9 into each white cell so that no number repeats in any row, column, or bold region.

*Our testing was fine in a single country, like the US where Sudoku originated. But when we considered the rules of the road in Japan, and then the unusual spacing initially seen in Britain too, everything got messed up. Single systems are not useful. We'll need to think about at least two, maybe three at a time to get to ASI.*

					6		8	
1				5				2
	2		4			1		
		3			9		7	
2				3				8
	7		8			3		
		8			4		9	
3				6				5
	1		5
