

Wildcard Sudoku by Bill Murphy

Rules: Insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region. Also, there is a “wildcard” number to be determined while solving. Cells with a greater than (>) symbol must contain a number larger than the wildcard and cells with a less than (<) symbol must contain a number smaller than the wildcard.

>			>		6	7	4	5
	>			>		6	8	3
		>			>		2	9
	>			>				4
>			>	3	<			<
6				<			<	
1	3		<			<		
8	5	4		<			<	
2	6	9	4		<			<
