The Final Boss? (aka 👑🦍) by Thomas Snyder

WANTED DEAD OR ALIVE, REWARD: 1,000,000 📎 (or cash equivalent)

*Time for the last **AI** call after all the **AI** Sudoku puzzles. Time for "Any Intelligence" to show up and follow this **AI** to the end. An **AI** story, if intended for the masses, probably needs to show the defeat of the **AI** by the hero. But what if this isn't that kind of story? What if you had a big **AI**, and were wise enough to be **AI** of **AI** things. Like the rich/powerful **AI** driving lots of **AI** schemes and wrecking so many things all for their own **AI**. Our **AI** character Dr. S might be just a young F**??**RY in that tale after all. Is it time to reconsider other links from the start of July in a new light?*
