

Bent Diagonals Sudoku by Bill Murphy

Rules: Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). Numbers must not repeat along the four “bent” diagonals that turn 90 degrees in the center cell. (An example of a bent diagonal starts at R1C1, moves to the center at R5C5, and then goes back out to R9C1 in the same column it started in.)

	5	7	1			9	8	
2								1
9								3
				5				7
			3		1			
5				7				
1								9
3								4
	6	9			3	5	7
