

XIVI Pairs Sudoku by clover!

Rules: Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). Whenever an XI or VI, reflecting the numbers 11 or 6 in Roman numerals, is placed on the edge between cells, the numbers in the two adjacent cells must sum to exactly 11 or 6. (Pairs of cells without an XI or VI can have any sum value.)
