

XIIVII Pairs Sudoku by clover!

Rules: Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). Whenever an XII or VII, reflecting the numbers 12 or 7 in Roman numerals, is placed on the edge between cells, the numbers in the two adjacent cells must sum to exactly 12 or 7. (Pairs of cells without an XII or VII can have any sum value.)

	VII	8				XII	
VII			XII			XII	1
	VII						XII
1		VII					
	XII	9		1		VII	
					XII		9
VII						XII	
9	VII						XII
VII			XII	2		XII
