

Loopdoku by clover!

Rules: Insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region. Also, draw a single, non-intersecting loop that passes through all cells except for the gray central cell, moving only up, down, left, or right between cells. The loop must travel straight through every cell with an odd number and turn in every cell with an even number.

2	4	6				1	3	8
3								2
5		8				6		4
			3	6	5			
			8		2			
			1	4	7			
7		4				2		3
9								5
8	3	5				7	1	6
