

# Numbered Rooms Sudoku by Bill Murphy

Rules: Insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region. Also, clues outside the grid indicate the value to be placed in the Nth cell in the corresponding row/column direction, where N is the value of the first cell in the grid in that direction. (For example, if 5 was in R1C4 just below the outside 6 clue, the 6 in column 4 would be in R5C4.)

4		3		1		7		8	5
8		1		7		6		9	
	7		4		9		1		3
2		5		9		1		2	6
	8		8		4
