

Even Sandwich Sudoku by clover!

Rules: Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). Also, the clues outside the grid indicate all numbers in that row or column surrounded by even numbers on both sides (“sandwiched”). Clues can be given in any order, and all such numbers are given. If no clue is given, there may be any count of values (including no values) sandwiched between even numbers in that row or column.
