# Between Lines Sudoku by Bill Murphy

Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). Also, numbers along each line must have values strictly between the values of the two numbers in the circle cells bounding that particular line. (For example, R3C2, R3C3 and R4C2 must have values strictly between 1 and 4, the values in R4C1 and R2C3.)
