

Between Lines Sudoku by clover!

Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). Also, numbers along each line must have values strictly between the values of the two numbers in the circle cells bounding that particular line. (For example, R1C3 and R1C4 must have values between 1 and 4, the values in R1C2 and R1C5.)
