

Between Lines Sudoku by clover!

Standard Sudoku rules (insert a number from 1 to 8 into each cell so that no number repeats in any row, column, or bold region). Also, numbers along each line must have values strictly between the values of the two numbers in the circle cells bounding that particular line. (For instance, a line whose circles contain 3 and 7 must only contain some combinations of 4s, 5s, and/or 6s.)

Straight and Narrow
