

Encaged Three Sudoku by clover!

Insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region. Also, all threes are encaged by even numbers; this means that around the threes all orthogonally adjacent cells must be even.

1		9	2	5	4		6	7
								9
5		7						
4								3
9								4
8								1
						1		2
2								
7	5		1	2	9	8		6

... I Am Still Just a Three in a Cage
