

# Arrow Sudoku (Repeating) by Bill Murphy

Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). Some arrow shapes are in the grid; the sum of the numbers along the path of each arrow must equal the number in the circled cell. At least one of the numbers along the path in each arrow must be repeated. (E.g.,  $1 + 1 + 7 = 9$  would be a valid sum but  $2 + 3 + 4 = 9$  would not, as no number repeats.)
