

Remote Clones Sudoku by Bill Murphy

Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). Some cells are marked with gray lines pointing out from their centers; in the directions of those lines, the numbers entered N cells away must be identical where N is the value in the cell with the lines. Not all possible gray lines are given. (For example, since R1C4 = 2 with lines going left and down, R1C2 and R3C4 must contain the same number.)
