

Pole Position Sudoku by clover!

Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). The first number in each row or column (i.e., the leftmost or topmost cell) indicates the position of the number 1 within that row or column. (For instance, if the number at the top of column 2 (R1C2) is 8, then 1 is positioned in the eighth row in that column, R8C2.)
