

Slot Machine Sudoku by Bill Murphy

Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). Each green stripe contains the same sequence of numbers when reading down the columns and wrapping back to the top; the sequence can start at any cell along each stripe. (For instance, if the first stripe contains the numbers 123456789 from top to bottom, the other two could contain 345678912 and 789123456.)
