

X-Sums Sudoku by clover!

Rules: Standard Sudoku rules (insert a number from 1 to 9 into each cell so that no number repeats in any row, column, or bold region). Also, the clues outside the grid indicate the sum of the first X numbers placed in the corresponding direction, where X is equal to the first number placed in that direction (e.g., because R3C1 is 6, the six numbers in R3C1, R3C2, and on to R3C6 all add up to 31).
